# Mini-rail

# Mini-rail

The mini-rail system is the slimmest and most innovative picture hanging system in the world. The rail, white or silver, just 16mm (5/8") high is hardly noticeable on your walls and supports weights of up to 25kg/M or 50lb/3'. If you want an elegant, barely visible hanging system, the mini-rail system is your best choice.

# Clip-rail Max

# Clip-rail Max

The Clip-rail Max system is a hanging system for the perfectionist. The Clip-rail Max features an extra top lip that connects with your ceiling. With this system your ceiling, wall, and hanging system smoothly unites. The Clip-rail Max system butts up to your ceiling to create a neat joint. The additional channel can be used to conceal speaker or other cabling.

# 2Hang

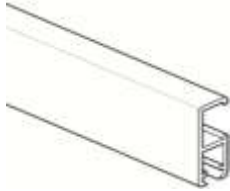

# 2Hang

The patented Clip-rail 2 Hang system features a heavy-duty rail for loads of up to 45kg/M or 91lb/3'. The rail design is compact and looks very attractive in professional and residential environments. The thick-walled rail makes the Clip-rail 2 Hang system an ideal solution when heavier works of art need to be hung on a system that looks elegant and attractive.

# 2Hang & Light

# 2Hang & Light

The Clip-rail 2 Hang & Light system is a revolutionary picture hanging and lighting system in one. In combination with LED bulbs, the Clip-rail 2 Hang & Light rail is very energy efficient. The 12 volt voltage supply wires are incorporated in the patented rail. The easy-fit armatures are simply clicked into the rail in whatever position you want. If you want a safe, multifunctional hanging system with integral lighting, the Clip-rail 2 Hang & Light system is your best choice.

# Multi-rail Crown

The Multi-rail Crown system is suitable for both new construction and renovations to existing properties, and is very appealing when installed in classical buildings. As the Multi-rail Crown is concealed behind a moulding, the walls are left uncluttered allowing viewers to focus solely on the items being displayed. Multi-rail Crown is easily installed by handy DIY enthusiasts and professional contractors alike. Multi-rail Crown is easily integrated into plaster, wood and urethane crown mouldings and chair rails, prior to moulding installation. Corner connections are created easily by mitering the rail.

# Multi-rail Crown

The Multi-rail Crown system is a unique and patented art suspension system for direct screw fastening to the wall, and comes equipped with a 12 volt power rail. The Multi-rail crown is an exceptionally sturdy and solid profile, which can be almost invisibly concealed behind the crown moulding of your choice. Multi-rail Crown is a revolutionary system with an unprecedented number of possibilities. You can hang paintings, photos, posters, and postcards in the blink of an eye! Easily movable light fittings can be clicked into the rail anywhere you like. In addition, the Multi-rail Crown is capable of suspending and powering the new 12volt Powerhook which allows you to hang and power 12volt digital picture frames without batteries or unsightly supply cords.

# Multi-rail Flat

The Multi-rail Flat system is suitable for both new construction and renovations to existing properties. As the Multi-rail Flat is concealed behind a moulding, the walls are left uncluttered allowing viewers to focus solely on the items being displayed. Multi-rail Flat is easily installed by handy DIY enthusiasts and professional contractors alike. Multi-rail Flat is mounted on the ceiling and drywall is installed on top to conceal all fastening hardware leaving the Multi-rail Flat virtually invisible. You can also install the Multi-rail Flat behind a single or double flat decorative framework (shown in image above). Corner connections are created easily by mitering the rail.

# J-rail

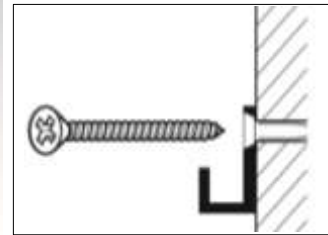

# J-rail

This simple and strong hanging system, which was inspired by the shape of the letter J, can be used in many different ways. When used in combination with the hanging rods, the J-rail is ideal for applications where art works need to be alternated on high walls. An invisible Perlon cord or robust steel cable are also possible options. Due to it's simplicity and numerous hanging options, the J-rail is often used in applications where functionality is the main priority.

# J-rail XL

# J-rail XL

The J-rail XL system is used mainly for professional applications, or where extremely high load capacity is required. The highly effective, thick-walled aluminum profile is capable of supporting loads of up to 100kg/M or 200lb/3'. In addition, the system and fastening screws are pre-finished with durable powder coated surfaces which enhances any décor, and provides the finishing touch to your installation!

# U-rail

# U-rail

The patented U-rail system has been purpose-designed to turn your suspended ceiling into a flexible hanging system in a matter of minutes. The rail is available in the same colour as the metal T-Bar supports and attaches to blocking, making it almost invisible. In rooms where a suspended ceiling has been installed, the U-rail system is not only the perfect hanging solution for works of art, it can also be used to hang notice boards and white boards.

# Picture Hit

Transform your interior in the blink of an eye! The Picture Hit system is the flexible and convenient suspension system for hanging papers, memos, photos, maps etc. In just a few steps, you can create a unique photo wall. The Picture Hits are ideal for use in schools, shops, offices and of course, your own living room. The Picture Hits are transparent clips for the easy linking together of cards and photos. The Picture Hits can be directly rotated in any of Hang It Up's picture hanging rails. A transparent distance strip can be positioned in order to start the row of cards/photos at eye level.
